

### 39. Road Jct. to Lake Desolation

Chatfield Corner where Barney Road from the west intersects the Lake Desolation Road from the south is at the base of the climb to the high lands where Lake Desolation is located.

It is an open area in the dense forest which grows on the sides of this first mountain of the Adirondacks. Firewood production is an important activity in this region. The mountain is not at all spectacular as are some of those farther north. It is a great mass of trackless forest which was heavily lumbered in the past.
