Dear Mr. Harrington,

The following are my turf management recommendations for Charles R. Wood Festival Park for the 2017 season. Due to the additional events scheduled for this year I have added an additional deep tine aeration.

It will be paramount to work together on irrigation, mowing, fertilization and aeration. Once again I would like to donate my time to manage the irrigation system and to perform weekly inspections. As always I will meet with you as you feel needed at the site.

**C. NOVEMBER RENOVATION WORK: Post Season**

1. Twice per season deep tine all turf areas with 3/4" solid tines to a depth of ten (10") inches. The timing of the first service will be determined by the intensity of the events scheduled. Deep Tine all turf areas with 3/4" solid tine to a depth of 10".
2. Core aerate all sodded areas. Utilize a 5/8" hollow tine removing cores.
3. Verti-cut all sod in two (2) directions as to break up cores.
4. Mow all turf to a height of two (2-1/2") and one half inches collecting all debris and removing from site.
5. Top-dress all turf areas to a depth of one (1/4") quarter inch with a blend of 70% root zone (USGA) sand and 30% compost.
6. Over-seed all turf areas with a wave over-seeder in two (2) directions Apply Kentucky Bluegrass and Perennial Rye grass at a 80/20 blend. Seed at three (3) lbs. per 1,000 sq. ft. in each direction.

**Total Cost C: \$8,442.76**

I have anticipated the need to over-seed this Fall due to the use of Park for 2017. Thank you for the opportunity to provide this quote.
