IN-PERSON**

**For more information call 518-761-6556**

**To register go to  
[Warrencountyny.gov/residents/waste](http://Warrencountyny.gov/residents/waste)**

# Warren County Wants Input on How We Manage Food and Yard Waste

Warren County produces about 25,000 tons of food and yard waste every year – that’s enough to cover **more than half of the former Magic Forest Theme Park!**

So, we are preparing an *Organics Management Plan* to identify potential strategies to compost this waste and divert it from landfills.

**We want your input on how we should manage food and yard waste in Warren County!**

What are other communities doing?

- Several communities, including Town of Bethlehem, Ulster County and Onondaga County allow residents to bring food and yard waste to a drop off location or municipal composting facility. The finished compost is sold or given away to residents and businesses.
- Some communities with compost facilities have private haulers that provide curbside food waste collection.
- Some New York State communities operate curbside collection programs and support community initiatives such as community gardens.

## What is compost?

A nutrient rich material that improves soil health.

## Why compost?

Composting is a sustainable way to manage food and yard waste, keep it out of landfills, and reduce greenhouse gas emissions.

## Did you know?

Businesses that generate large amounts of food scraps will soon be required to recycle food scraps if they are within 25 miles of an organic recycler (NYS Food Donation and Food Scraps Recycling Law).

## Did you Know?

Warren County could compost over 30% of the garbage currently being sent to landfills.

This project has been funded by the Climate Smart Community Grant Program, Title 15 of the Environmental Protection Fund through the New York State Department of Environmental Conservation.
